

How to Locate & Search for a Drug Using the Formulary Tool

Upon completing
this video, you
will be able to:

Access the Formulary Tool

Search for a drug and
locate additional
information within the
Formulary Tool

Background music included.
Turn your speaker volume up to a comfortable
level.

Access the Formulary Tool

The image shows a screenshot of a web browser window. The address bar contains the text "www.wellcar". A Bing Suggestions dropdown menu is open, showing the option "Turn on suggestions (send keystrokes to Bing)". The Google logo is prominently displayed in the center of the page. A blue starburst graphic with the text "Step 1" is overlaid on the left side of the page. A large orange banner with the text "Type www.wellcare.com" is positioned below the starburst. Below the banner is the Google search bar, which is empty. The "Google Search" and "I'm Feeling Lucky" buttons are visible below the search bar. At the bottom of the page, there is a small text link: "Join Mercy Corps and the Hispanic Federation in supporting Puerto Rican recovery".

How to Access Formulary Tool Recap

1. Type www.wellcare.com in web browser
2. Select a state
3. Select need a plan
4. Select a plan and type in Zip code
5. Find health plan and select I want to learn about this plan
6. Go to Pharmacy and select Drug List (Formulary)
7. Search a drug using any of the search options

Next, let's review how to search for a drug using the Formulary Tool.

The screenshot shows the WellCare website's formulary tool interface. At the top, there is a navigation bar with the WellCare logo and the tagline "Beyond Healthcare. A Better You." followed by links for "Need a Plan", "Members", "Providers", and "Corporate". A search button labeled "Find a Provider/Pharmacy" is located on the right. Below the navigation bar, the page displays "Drug Search" and "Formulary Id: 18441". A horizontal bar highlights "Step 1 Search for a drug". Underneath, there is an "Alphabetical Search" section with a row of letters from A to Z. Below that, a "Therapeutic Class Search" section lists various drug categories such as Analgesics, Anesthetics, and Anti-Infectives.

You can find more information about a drug at [HealthWise](#).

Scroll down the resulting list of drugs to find Crestor. Note that the drug rosuvastatin will not show in the search.

Again, this is important to point out because, while the brand name Crestor is not covered, the member is most likely actually taking the generic drug, rosuvastatin.

Click on the appropriate strength of Crestor to return results for both the brand and the generic.

Searching for a Drug Using the Formulary Tool

The screenshot shows the WellCare website's drug search interface. At the top, there are navigation links for 'Need a Plan', 'Members', 'Providers', and 'Corporate', along with a search bar for 'Find a Provider/P'. The main content area displays 'Drug Search' with a 'Main Content' link and 'Formulary Id: 18441'. Below this, a 'Start Over' link is present, followed by the instruction 'Please select a drug from the list below to continue.' A list of drugs is shown, with the first four items (Crestor) marked as 'NF' (Non-Formulary) and the last four items (Rosuvastatin) marked as 'T1' (Tier 1). Three callout boxes provide additional context: an orange box explains that Crestor is NF while its generic, Rosuvastatin, is on Tier 1; another orange box notes that if a member is taking Crestor, they are likely taking the generic Rosuvastatin; and a yellow box at the bottom emphasizes that agents should always verify the specific drug form the member is taking.

Formulary Effective Date: 05/01/2018
Updated: 05/2018

In this search, you notice the brand name drug, Crestor, is Non-Formulary (NF). However, the GENERIC for Crestor, Rosuvastatin, is covered on Tier 1 (T1).

This is important. Let's say the member indicates he/she is taking Crestor. He/she is most likely taking the generic, Rosuvastatin.

As an agent, you should ALWAYS verify which form of drug the member is taking. In this case, the agent should verify if the member is taking Crestor.

Searching for a Drug Using the Formulary Tool

The screenshot shows the WellCare Formulary Tool interface. At the top, there is a navigation bar with the WellCare logo and the tagline "Beyond Healthcare. A Better You." followed by links for "Need a Plan", "Members", "Providers", and "Corporate". A green button with a magnifying glass icon and the text "Find a Provider/Pharmacy" is also present. Below the navigation bar, the page is titled "Drug Search" with the "Formulary Id: 18441" displayed. A horizontal line separates the header from the search options. There are three search methods listed: "Alphabetical Search" with a link to "ABCDEFGHIJKLMNOPQRSTUVWXYZ"; "Brand & Generic Name Search" with a text input field and a "Search" button; and "Therapeutic Class Search" with a list of links for various drug classes: Analgesics, Anesthetics, Anti-Infectives, Antineoplastic Agents, Cardiovascular, Central Nervous System, Endocrine And Metabolic, Gastrointestinal, Genitourinary, Hematologic, Immunologic Agents, Nutritional/Supplements, and Ophthalmic.

Let's search for Crestor using the **Therapeutic Class Search** function.

Searching for a Drug Using the Formulary Tool

The screenshot shows the WellCare website's Formulary Tool. At the top, there is a navigation bar with the WellCare logo, "Need a Plan", "Members", "Providers", and "Corporate" dropdown menus, and a "Find a Provider/Pharmacy" button. Below the navigation bar, the page is titled "Drug Search" with "Formulary Id: 18441".

The main content area is divided into three search methods:

- Alphabetical Search:** A list of letters from A to Z, each with a small blue underline.
- Brand & Generic Name Search:** A text input field followed by a "Search" button.
- Therapeutic Class Search:** A list of therapeutic classes, each with a blue underline. An orange callout box points to the "Cardiovascular" link.

The orange callout box contains the following text:

Searching for a drug by therapeutic class is the least effective method because the appropriate class is not always intuitive. In the example of Crestor, click on Cardiovascular.

At the bottom of the page, there is a copyright notice: "©1997-2018 Managed Markets Insight and Technology, LLC. All Rights Reserved | [Terms of Use](#)".

	rosuvastatin calcium tablet 20 mg oral	Cardiovascular Antilipemics, Hmg-Coa Reductase Inhibitors	Tablet 20 MG			more info	

No Crestor displayed.

Note that when searching by therapeutic class, only formulary products return in the results: therefore, Crestor does not show at all.

The generic for Crestor, rosuvastatin, does return in the results, but one would need to know how to look for it.

How to Search for a Drug Using the Formulary Tool Recap

1. Search for a drug using any of the three different methods:
 - * By Name, using the Brand & Generic Name Search Field
 - * Alphabetical Search
 - * Therapeutic Class
2. Once the drug is identified, verify which form of drug (generic or name brand) the member is taking.
3. Click on the selected drug to see more coverage information, such as restrictions.

Thank you for watching.
You can now do the following:

Access the Formulary Tool

Search for a Drug and Locate Information Within the Formulary Tool
